

CAPA / SCT FLASH TUNER

Overview

CAPA's Flash Tuner allows you to replace the factory program of your AU - BF Falcon and Territory with one of 3 custom programs. The factory program is stored on the Flash Tuner so the vehicle can be put back to standard at any time. There is no limit to the amount of times you can switch between performance and factory tunes.

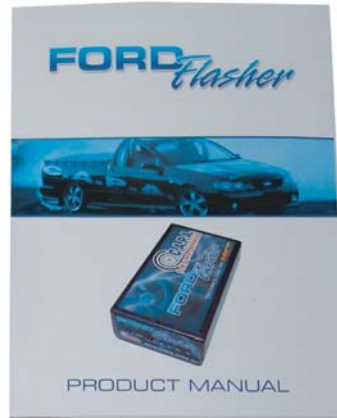

Tune your vehicle to improve drivability, performance and fuel economy with the touch of a button. New flash tuner technology, developed in America specifically for Australian Fords comes to you exclusively from CAPA Performance through its dealer network around Australia.

The simplicity of this product and value for money makes this technology the world's fastest growing tuning product. Plug it into the car, push the button and load your new performance or economy tune. Push the button again to switch back to the factory tune or another custom tune.

Package Includes

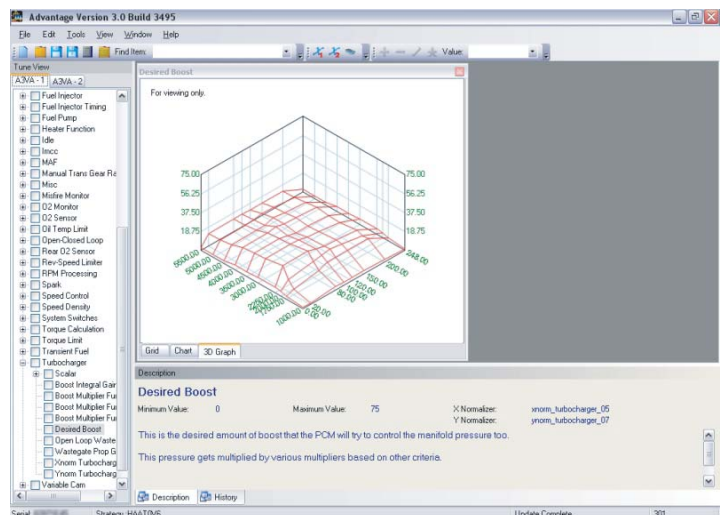

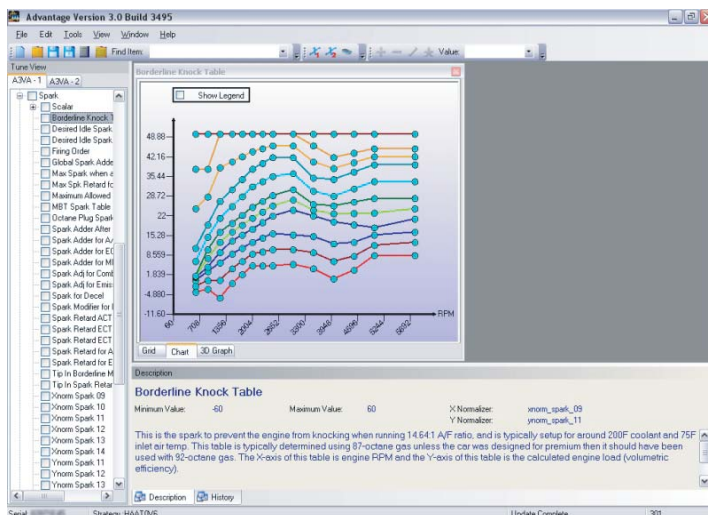

- Flash Tuner
- OBD-II Cable
- Installation Instructions

 Tuning Solution
 in Australia*

Advantage III Software

Designed for workshops and tuning shops, Advantage III gives total flexibility to produce custom programs on a laptop / pc. Programs can be loaded into Flash Tuners and Eliminator Switch Chips. This program is Windows Based and has a help screen giving the user information on all tuning parameters. Advantage software takes the guess work out of custom tuning.

CAPA / SCT FLASH TUNER

- * Once the Flash Tuner has been used to program a vehicle, it will be VIN locked to that particular vehicle until the programming has been returned to the stock setting.
- * The Flash Tuner Box can store up to 3 custom programs at any one time, loading to and from the flash tuner box can be done an infinite amount of times.
- * The flash tuner can be changed over to a new vehicle, it must be cleared using software available from CAPA. This process can only be performed 5 times. Then it must go back to SCT / USA for a Reset.
- * Software will be available to download original program from vehicle processor if code has not already been made public. This software must be requested.
- * General software files generated by CAPA will become available to all dealers upon request.
- * CAPA Tune Files are also available as part of the Flash Tuner for retail sale. This retail product is also available to dealers.

Australia's Most Powerful XR8

CAPA's Supercharged XR8 uses the BA Flash Tuner to help produce 1000HP.

Australia's Fastest XR6 Turbo

Equipped with CAPA's Flash Tuner, Adam Hargrave and the guys at Horsepower Factory were able to cover the quarter mile in 9.98 Seconds @ 140MPH

Vehicle Applications

- *4.6L V8 Ford Explorer
- *4.0L V6 Ford Explorer

American Vehicles

- *Complete Range of American Cars & Trucks as per USA SCT Database. Sold as single database file to dealers as required. See price list.

The Flash Tuner is so easy to use, a few simple steps is all it takes to load a new program into a vehicle.

1. Plug the flash tuner into the diagnostics port of your car (under the fuse panel).

2. With the key off, use the 'SELECT' button to choose the program you wish to install into the car (Factory, 1, 2 or 3).

3. With the LED lit up on the program you wish to install, hold the program button for 3 seconds. The LEDs will flash on and off. This will time out after 30 seconds.

4. While the LEDs are flashing, turn the ignition to on (dash lights illuminate) but do not start the vehicle. The flash tuner will now download your factory program and upload the new program.

5. Once the lights stop flashing, the programming is done. Turn the key to the off position and remove the OBD-II connector. Turn the key to on and verify that the car starts.
